

**Certified Appliance Recycler Orphan Waste Form**

California law requires that a Certified Appliance Recycler (CAR) must remove and properly manage all Materials that Require Special Handling (MRSH) from discarded major appliances before being crushed, baled, shredded, sawed, sheared apart or otherwise processed in a manner that could result in the release of these materials as specified in the Health and Safety Code 25211 et al.

In response to growing concerns regarding the inability of scrap recycling facilities to accept and manage abandoned waste appliances that have often had MRSH removed, AB 1447 (2007) introduced new statutory provision which would allow abandoned waste appliances to be accepted by scrap metal facilities provided certain requirements are met by the person who transports, delivers or sells the abandoned waste appliances to the scrap recycling facility, including a form of government issued identification and written certification that the appliance was obtained in its current condition and did not process, arrange to have processed or knowingly accept the appliance from any other person who processed it or arranged to have it processed as well as a brief description of the origin of the appliance.

The information contained within DTSC Form 1459 is to be completed by the person who transports, delivers or sells abandon waste appliances to a scrap recycling facility and is consistent with the requirements found in subdivision (b) subpart (2)(B) of Section 25212 of the Health and Safety Code.

For more appliance recycling information contact: (916) 445-6130 or visit
